Dr. Mohamed Amine Mahmoudi
National School of Artificial Intelligence,
Algiers, Algeria.
mohamed.mahmoudi@ensia.edu.dz
November 23, 2025.

To Whom It May Concern,

I strongly recommend Rami Hadid for any job or scholarship application. I am an associate professor at the National School of Artificial Intelligence in Algiers, Algeria. I had the pleasure of getting to know Rami Hadid when I was his professor for Computer Architecture II: RISC-V. This course included 21 hours of lectures, 21 hours of tutorials, and 21 hours of lab work. It covered the following topics: RISC-V instruction set architecture, RISC-V assembly language programming and debugging, RISC-V pipelining, RISC-V memory hierarchy, RISC-V I/O, and RISC-V interrupts. We also studied the RISC-V datapath and control unit.

Rami Hadid was one of the best students in the class. Very attentive in class, he asked questions as soon as he had the slightest doubt. He actively participated in tutorials and lab sessions, always ready to help his classmates. Punctual, he never missed a class and submitted his assignments with great consistency. A diligent worker, he always finished them on time. Passionate about learning, he excelled in programming and successfully completed all tutorial and lab exercises. His debugging skills were remarkable: he was able to find and fix bugs in his programs. This ability to identify and correct errors, one of his greatest strengths, reflects his attention to detail. He always took the time to study and understand a problem before attempting to solve it, which reflected his composure and his ability to face challenges without the stress and frustration that many students experience in similar situations. Finally, he was an excellent collaborator, able to work effectively as part of a team. He communicated his ideas very well and was able to persuade his teammates and his professor. He was very skilled at writing reports and was able to produce detailed ones for his lab work. He was also very comfortable presenting his ideas and was able to present his lab work in front of the class.

On a personal level, Rami Hadid is a disciplined and hardworking student with a pleasant personality. He always chooses his words carefully when addressing his professors and classmates. He is very polite and courteous.

If I can be of any further assistance or provide additional information, please do not hesitate to contact me.

Sincerely,
Dr. Mohamed Amine Mahmoudi.

20 July 2026

To Whom It May Concern,

I am pleased to write this letter of recommendation for Rami Hadid. I am the Chief Technology Officer at FAST (fastapp.dz), a food delivery platform based in Algiers, Algeria, and I had the pleasure of supervising Rami during his internship within our engineering team. From the beginning, he adapted quickly to our working environment and showed a strong willingness to learn. Although he had limited experience with some of the technologies we used, he became productive in a short period of time through his curiosity, discipline, and ability to absorb feedback. During his internship, he contributed to the development of several features of our platform, working on both client-side and server-side components while participating in testing, debugging, and continuous improvement of the application. Throughout this experience, he consistently demonstrated strong analytical skills, attention to detail, and a genuine sense of responsibility.

Rami was one of the most reliable interns I have supervised. He respected deadlines, accepted feedback with maturity, and continuously improved his work after every review. He worked independently whenever appropriate while knowing when to seek guidance, and his professionalism quickly earned the trust of the engineering team. Beyond his technical abilities, he is respectful, polite, and easy to work with. He communicates clearly, collaborates effectively with colleagues, and contributes positively to the working environment. His dependability and commitment made him a valued member of our team throughout his internship.

On a personal level, Rami is a disciplined, hardworking, and motivated individual with a genuine desire to keep learning and improving. He approaches challenges with patience, determination, and a thoughtful mindset, always striving to produce high-quality work. I am confident that these qualities will enable him to succeed in any academic or professional environment, and I recommend him without reservation. If I can provide any additional information, please do not hesitate to contact me.

Sincerely,

Anis Derris
Chief Technology Officer, FAST
